

The robust screen that  
feels at home anywhere

# SC700

Would you like all the convenience of a screen without intrusive installation work? The SC700 is **simple to install** on any window profile or façade and keeps out excess sunlight and heat. The box, bottom lath and guide rails are made of extruded aluminium with a powder coating or anodised in its natural colour. The **weighted bottom lath** is available in 2 depths. This screen is available in sizes up to **9 m<sup>2</sup> in 1 piece** and complies with wind class 2.

## Dimensions

Single screen

Multiple screens

Choice of 7 guide rail types. It is possible to **combine 2 or 3 fabrics** in a single screen box up to a maximum box width of 6 m. Two types of combination are possible:

- with the fabrics immediately next to one another [DVC]
- with a space of at least 25 mm and no more than 500 mm between the screens [DVS]

These combined fabrics can be **operated either together or separately** as you choose.
